

# Unit 6 Seminar Preparation

## Security Standards

Please carry out this activity before joining the seminar this week. Your answers will be discussed during the seminar.

## Activity

Review the following links/ websites and answer the questions below:

[ICO \(2020\) Guide to the General Data Protection Regulation \(GDPR\).](#)

[PCI Security Standards.org \(2020\) Official PCI Security Standards Council Site - PCI Security Standards Overview.](#)

[HIPAA \(2020\) HIPAA For Dummies – HIPAA Guide .](#)

- Which of the standards discussed in the sources above would apply to the organisation discussed in the assessment? For example, a company providing services to anyone living in Europe or a European-based company or public body would most likely be subject to GDPR. A company handling online payments would most likely need to meet PCI-DSS standards.
  - **Inform the users about the data collection and how it will be used**
  - **Process the data only for its purpose**
  - **GDPR requires to delete the user data if requested, so the system should support it**
  - **Data should be stored outside the EU and UK region without propose government approvals**
  - **CIA**
  - **Any data loss should be reported timely**
- Evaluate the company against the appropriate standards and decide how would you check if standards were being met?
  - **A consent should be secured before storing customer and vendor data of Pampered pets – Website cookie should meet the GDPR standards**
  - **Ensure the audit of the data occurs regularly and a written policy document to support in case of any security incident**
- What would your recommendations be to meet those standards?
  - **Pampered Pet should implement PCI-DSS since they will process payment for online business**
- What assumptions have you made?
  - **Pampered Pet is located in EU / UK region**

- **Pampers pet will deploy e-commers website and do online business**
- **Pampers pet will also on-board vendors on their e-commers website for billing/invoicing**
